These models look so fantastic that they make my\u2665\u2665\u2665\u2665\u2665\u2665hard.. I can easily understand why the reviews are mixed about Trackday Manager. So let's get to the Pros and Cons.

Pros

Has a bit of a learning curve making it challenging even against ai.
Graphics are decent.
Variety of upgrades and customization.
Sponsorships and skill upgrades not bad.
Enough tracks and cars to not make it boring.

Cons

Game freezing from time to time is my biggest complaint. Has happened to me right before start to 2 laps to go. Very disappointing for a game that is out of Beta and "live"
For a game that is not FPS intensive it sure does have lag issues from time to time making it incredibly annoying when it happens.
Needs to be some explanation of usage of controls/commands to the driver.

All in All this game is not bad but needs some TLC on the above issues. 6/10 Stars.

Edit: 5/22/16: HAVING played the game now for many hrs it is fun and challenging. Arctic Hazard has made some very good updates to clean up some of the issues with lag among other things. The lack of a large community is the only complaint I now have, the game is worth the money.. This is a classic tetris game and not a very good one either.

The music could be more variable I think.

The graphics, well, it's tetris blocks within an environment which isn't anything of special.

The worst however, is not being able to choose keys to use and the current setup is at least for me, awful.

Even on sale it's not worth it.. Stunning Visuals, I just finished it and throughout a lot of the game I would just stand in awe for several minutes. If you play it yourself you can see how much effort went into making this game's aesthetic and art direction great. My only complaint however is that the game gives you too much freedom when it comes to the combat. First off, you have 8 completely different vigors which give you powers. Then you have 10 different guns, and finally there's a "sky-hook" which allows you to navigate around stages. All of these 3 things are supposed to be used together in combat and 90% of the time it just feels super clunky.. + Great game concept

+ Nice visuals (although the anims might need more polish ;))

+ Skillbased PVP and full loot

+ responsive devs

- played 3h and have the feeling "i have seen everything" (which of course is not the case since not the complete map was

opened) but it lacked some gameplay options.

Do not let yourself influence by all these negative free trial haters.

Get the game 7 days for free and make your own opinion :). As this game stands now I absolutely can't recommend it to anyone. It hasn't been updated in a long time and at this point I would be surprised if it ever will be. At it's current state it's not worth your time:

- Except for the main character Cyril, the voice acting sounds like somebody recorded it with a potato
- The sound effects in this game sound really cheap and cheesy
- While I personally don't mind outdated 3D graphics or even pixelated 2D graphics, this game combines cartoonish 3D environment with 2D sprites for characters and it looks absolutely horrendous. They would have been better off sticking to either 2D or 3D
- The animations are done very poorly and do not look smooth at all
- The combat system is very clunky and needs a serious rework. You end up using hit and run tactics in order to kill any enemy who doesn't die in 2 hits. You have very little control to aim your flames so most of the time you won't hit anything with it
- Currently the game only has 2 short levels

The only selling points of this game are that you play as a dragon and that the voice actor of the dragon did really well. Unfortunately 2 positive points are not enough compared to the faults this game has. Perhaps they will update this game one day, who knows? But until then it is just a bad game that needs serious work.. so i bought mai and she came with 2 outfits thats it. KT this is low even for you. ABOUT TIME!!!

ive been playing rll2 on 360 and couldnt wait for rll3 last night i was just going through the store and saw it bought it straight away downloaded it and then played it, first thoughts everything rll2 was plus more. looks better, gameplay is smoother and doesnt feel so blocky it just have that nice feel kinda like fifa. spent about 5 hours straight on be a pro mode didnt realise the sun came up. so yeah its kinda good.

btw play 9 a side state of origin way better then real origin.

add me and message me if you want a online match..

not much of a review but trust me its good buy it play a match n if you dont like it just refund it, but you wont want to refund it trust me.

I was given the key for this by the Brawsome guys after hitting up their table at PAX Aus 2013, where they were showing off MacGuffin's Curse, and while I'm definitely a fan of point and clicks, I had the middling expectation that I'd put maybe an obligatory ten minutes into it before deleting it from my computer, never to resurface from the depths of my steam backlog again.

I ended up completing it and clearing all the achievements in essentially one sitting. It's really very charming and funny, with a good 2-ish+ hours of casual gameplay, depending on how much you dawdle around. Definitely one for the to-buy list if it goes on sale for <\$5. The best CYOA game there is.

Why? Because you can turn people into tortoises.. I have played this game twice now, just to be sure. It cannot be completed as there is always a piece missing at the end and no way to get it.. ayy, thats pretty gud.... Very disappointing. Dated graphics, poorly implemented dialog system, simplistic combat, over simplified world map. The main reason I didn't get very far in the game is that it was just too dull.. Watch your back RPGMaker...

There's a new kid in town!

(Just joking, I'll always love you RPGMaker). Its a simple game where you find the hidden objects. I like the game and it makes you think. A+++

<https://www.youtube.com/watch?v=fQXxzDb37Ao>. I loved this game and found it much more enjoyable than Orcs Must Die 2. This was my intro to tower defense and I'm hooked! PLEASE PLEASE MAKE LEVELS!!!. Wouldn't suggest this. Just a re-color DLC and it doesn't look better than the original too.. TL:DR Fans of real Roguelikes like ADoM, NetHack(and its variants) *Angband, ToME, CoD, Stone Soup ect will find this one very shallow. For long time Roguelike fans, Cardinal Quest 2 is entirely lacking in the depth and variety that makes those games interesting and the reason they've been played for 25+ years. For those just getting their feet wet in the genre, it may provide a good introduction to how a Roguelike works without overwhelming the player. The unlockables are nice, and I like the pixel art and music, but as it stands the game is way too bare bones to recommend it to any but an absolute beginner to the genre.

+++++

To start, I'd like to say this is a Roguelike incredibly light. And when I say Roguelike, I mean a *real* Roguelike. Not "any game with permadeath and procedural generation" which seems to be what Roguelike means to a lot of people nowadays.

But a turn based (as in, every step you take causes the enemies to act)RPG in randomly generated maps where you make your way through the levels, killing enemies, collecting randomly generated items and levelling up similar to the old ASCII game Rogue. The base mechanics are like any roguelike. Turn based, top down map where you go around killing enemies and finding loot to proceed through the levels.

Compared to most real Roguelikes out there, Cardinal Quest 2 is very shallow. Theres no identification that I can see, and no negative/cursed items(theres no BUC status at all). There isnt even any diagonal movement. You have 5 item slots, 5 spell slots, and your standard "armor/vboots/vcap/vgauntlet/vmagic item/vweapon" (No shield that Ive seen) equipment. Beyond that, there doesnt seem to be any inventory - you dont seem to be able to carry anything beyond what you have equipped and your 5 spells and 5 items. When you find an item, you have the option to "trash" it for gold, or wear it, replacing what you have currently equipped. Theres no shops, but sometimes on a map theres a "scavenger" who has 3 different items to offer you.

Go around a map, collect pre identified items, go to the next screen when you find the exit. Level up on occassion with a tiny 9-skill skill tree. Thats it. There are 7 classes, only 3 of which are unlocked to start, and no races. You cant even name your character from what I can see. (if there is a way, let me know and I'll remove this line)

There is also unlockable perks and gear for each class that you can get by fulfilling certain conditions (like Rogue's Tale). Thats the main draw, and unfortunately appears to be one of the only draws.

Thing is, if there was stuff added it this game across the board it'd be a pretty good lightweight Roguelike. It has decent music and pixel art, unlockables, a global leaderboard and seems like a good foundation to build a deeper game on. As it stands, though, its bare bones. I really can't recommend it to anyone but the most absolute beginner to Roguelikes. Even in that case, theres way better lightweight Roguelikes out there (like Sproggiwood) for the beginner who's just learning the genre. For a longtime player of NetHack, ToME, and ADoM like myself theres not much here to keep you interested.
